

	Anti-Peptide YY (human, PYY)
	Mouse monoclonal antibody, biotinylated
CAT. NO.	ABS 029-01B
SPECIFICITY	ABS 029-01 binds human PYY. Cross-reactivity with NPY or PP in solution is <0.1%.
IMMUNOGEN	Synthetic human PYY
TESTED APPLICATIONS	ELISA
SPECIES REACTIVITY (POSITIVE)	Human
SPECIES REACTIVITY (NEGATIVE)	Not determined
EPITOPE SPECIFICITY	Not determined
PRESENTATION Content: Preparation: Form: Solvent: Storage:	150 μL,1 mg/mL +/- 15%. See Certificate of Analysis for details. Biotinylated Liquid 0.01 M phosphate buffer, pH 7.4, containing 0.14 M NaCl and 15 mM sodium azide 4-8°C without exposure to light. No precautions necessary during handling.
APPLICATION	<b>ELISA:</b> Biotinylated ABS 029-01 can be used as detection antibody with ABS 051-04 as a capture antibody for measuring PYY(3-36) by sandwich ELISA.
TARGET	Peptide tyrosine-tyrosine (PYY) amide is a 36 amino acid. PYY is a member of the pancreatic polypeptide (PP) family of peptides (neuropeptide Y (NPY), PYY and PP). While NPY is localized in neuron (both in the central and peripheral nervous system) and PP in the pancreatic islets, PYY is found in both neuron and the gut. PYY is released in response to food intake from the same endocrine cells (L cells) in the intestinal mucosa as the glucagon-like peptides and inhibits gall bladder secretion, gut motility, and pancreatic secretion. These effects are similar to those of PP and overlap with the gut inhibition activity of GLP-1.
