

## Anti-Peptide YY (human, PYY)

CAT. NO. ABS 029-01B

**OVERVIEW** 

 Product Name
 Anti-Peptide YY (human, PYY)
 Conjugation
 Biotin

 Description
 Mouse monoclonal antibody, biotinylated
 Host
 Mouse

 Isotype
 IgG1/k
 Clone
 1

Tested Applications ELISA

**SPECIFICITY** 

Specificity ABS 029-01 binds human PYY. Cross-reactivity with NPY or PP in solution is <0.1%.

ImmunogenSynthetic human PYYGene ID5697

Target Peptide tyrosine-tyrosine (PYY) amide is a 36 amino acid. PYY is a member of the pancreatic polypeptide (PP)

family of peptides (neuropeptide Y (NPY), PYY and PP). While NPY is localized in neurons (both in the central and peripheral nervous system) and PP in the pancreatic islets, PYY is found in both neurons and the gut. PYY is released in response to food intake from the same endocrine cells (L cells) in the intestinal mucosa as the glucagon-like peptides and inhibits gall bladder secretion, gut motility, and pancreatic secretion. These

effects are similar to those of PP and overlap with the gut inhibitory activity of GLP-1.

Species Reactivity Human Species Reactivity Not determined

POSITIVE NEGATIVE

**PROPERTIES** 

Form Liquid Unit Size 0,15 mL

**Concentration** 1 mg/mL ±15%, See CoA for lot details

PurificationProtein A or Protein G purifiedPurification NotesBSA free

**Storage buffer** 0.01 M phosphate buffer, pH 7.4, with 0.14 M NaCl and 15 mM sodium azide

**Storage condition** 2-8°C without exposure to light

Safety Wear protective clothing

**TESTED APPLICATIONS** 

ELISA Biotinylated ABS 029-01 can be used as a detection antibody with ABS 051-04 as a capture antibody for

measuring PYY(3-36) by sandwich ELISA.
