Immunogen	Recombinant monkey NGAL	Gene ID	697208
Target	Monkey neutrophil gelatinase-associated lipocalin (NGAL; also called lipocalin 2 or siderocalin) may, by analogy with its homologues in other mammalian species, be released from activated neutrophils in inflammation or infection, from certain epithelial cancers, and more dramatically from renal tubular cells in response to ischemic or nephrotoxic injury.		
Species Reactivity POSITIVE	Monkey	Species Reactivity NEGATIVE	Not determined
